Incredible sound in compact size

905

This is one of the best mini-loudspeakers on the market. It is capable of entering into every hi-fi system, and create a clear musical improvement compared with ordinary loudspeakers. And furthermore it is extremely reliable and easy to install. The 905 is constructed with a 13 cm coated bass/midrange unit with an incredible magnet power, and a 19 mm tweeter with magnetic fluid. The cabinet is tuned as a 5 ltr. reflex system, and as something completely exceptional in this loudspeaker category it is equipped with biwiring.

905 Specifications

Frequency response (+/- 4dB)	60-22.000 Hz
Sensitivity (1W, 1m)	89dB
Nominal Impedance	8 Ohms
Power Handling (music)	70 Watts
Crossover Frequency	4000 Hz
Biwiring	Yes
Size (H x W x D) cm	27 x 15 x 21

Exceptional musicality with flair for the detail

910

The 910 has an incredible ability to give the music life, and a lot of people have been surprised at its great sound stage and detailed sound. It is capable of giving a very convincing experience of any music style, and it is easy to install in every hi-fi system.

The 910 is constructed as a 2 way system with a handmade 13 cm coated bass/midrange unit and a 19 mm tweeter cooled with oil, in a 9 ltr. reflex cabinet. The biwiring facility gives the possibility of improved performance by using twin cables.

910 Specifications

Frequency response (+/- 4dB)	50-22.000 Hz
Sensitivity (1W, 1m)	89dB
Nominal Impedance	8 Ohms
Power Handling (music)	80 Watts
Crossover Frequency	4000 Hz
Biwiring	Yes
Size (H x W x D) cm	35 x 17 x 18

930 Specifications

Frequency response (+/- 4dB)	40-35.000 Hz
Sensitivity (1W, 1m)	89dB
Nominal Impedance	8 Ohms
Power Handling (music)	120 Watts
Crossover Frequency	3000 Hz
Biwiring	Yes
Size (H x W x D) cm	92 x 17 x 18.7

930

The 930 is one of these products where you inevitably experience that magic has a hand in it. The loudspeaker looks so simple and discreet that it seems amazing that the sound appears so dynamic and rich in musicality. But there are really no secrets. The fact is that the 930 is completely handmade in every detail, and is an extremely reliable loudspeaker which reproduces any music style in a correct balance.

The bass/midrange area is managed by a handmade 13 cm unit with coated membrane, and the high frequencies are reproduced by a handmade 25 mm alu-dome with magnetic fluid and double chamber. In the bottom of the 15 ltr. bass reflex cabinet you will find a closed chamber intended for filling with sand. And on the back is a 18k gold-plated biwiring terminal. 930 is supplied with spikes to mount in the MDF-base.

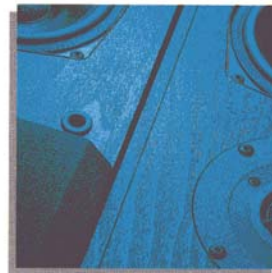

**Completely
handmade to bring
you absolutely close
to the music**

950 Specifications

Frequency response (+/- 4dB)	35-35.000 Hz
Sensitivity (1W, 1m)	91dB
Nominal Impedance	4 Ohms
Power Handling (music)	140 Watts
Crossover Frequency	250/2500 Hz
Biwiring	Yes
Size (H x W x D) cm	97 x 18 x 19.8

950

The design of the 950 itself, tells of something very unique. And all the people who have listened to it have been surprised at this extremely musical and powerful loudspeaker. 950 has the ability to reproduce the most sensitive details of the music, and at the same time keep a fantastic dynamic and natural balance.

950 is a completely handmade loudspeaker which is constructed as a 2 1/2 - way system with an integrated subwoofer in each cabinet. A handmade 13 cm unit manages the bass/midrange area, and the treble is reproduced by a 25 mm handmade alu-dome with magnetic fluid and double chamber. In the bottom of the 22 ltr. sealed system you will find a closed chamber intended for filling with sand. And on the back is a 18k gold-plated biwiring terminal. 950 is supplied with spikes to mount in the MDF-base.

joy at good music**

About caring..

A System Audio loudspeaker is produced according to methods which are unique.

An incredible care is put into every detail which involves the sound. All of it to obtain the finest quality of sound.

Testing drive units

Look at our drive units for instance. Every single unit is tested in a computer, and only the ones which comply with a series of fine tolerances will be used.

That's what we mean by caring.

The drive units are, by the way, a fine handmade mechanism with a remarkable reliability. The membranes are treated with a special coating which is absorbed in the fibres in the membrane to avoid colouring of the sound.

Handmade drive units

We have also given the cabinet some extra attention because, after all, it is the basis of the loudspeaker. The slim design makes the surface free of vibrations, and gives the best sound dispersion.

The actual manufacturing of the cabinets takes place in some incredible precise milling machines, which results in high quality and with that some very solid cabinets.

In the bottom of our floorstanding models you will find a closed chamber intended for filling with sand. This gives a fantastic opportunity of improving the sound, because the sand will catch vibrations.

Coating membranes

And at the same time this is the cheapest way of improving the performance of your system. An opportunity which is only provided by System Audio.

That's what we mean by caring.

On the back of our loudspeakers you will only find 18k gold-plated terminals. Gold gives the best transmission of the music signal and the terminals are so big they can easily handle the heaviest cables.

At the workstations where the loudspeakers are assembled there is constant control of the parts used in the loudspeakers. As a matter of fact, at pair of loudspeakers is tested as much as 3 times, before the employee who has assembled the loudspeaker from the beginning, gives his signature saying that the loudspeakers will live up to our demands.

That's what we mean by caring.

And it is this care which means that every product from System Audio has an extremely high performance and reliability. We dare to claim that when you have tried a System Audio product once, you will not settle for less.

We also know that the caring we have put in creating the loudspeakers will give you many years of pleasure out of the music you like.
