

floor standing loudspeaker SA1280

SA1280 combines two features rarely seen on loudspeakers: the combination of top class sound quality and beautiful design.

Having a finish that can match even the most nicely made furniture the SA1280 deserves to play a central role in the living room – which is also how to achieve the best sound quality. The slim design makes it easy for the speaker to fit in among your other furniture without dominating your living room. SA1280 is made to match all forms of music and Home Theatre. In combination with a quality amplifier from 50 to 200 Watts you will achieve a big and dynamic sound that seems much bigger than the speakers. SA1280 has been made for rooms from 15 to 45 square metres. The sound is rich on details, rhythm and musical integration. The sound stage is presented precisely between the speakers and into your living room in a natural way. The only basis for many hours of listening pleasure.

speed improves sound quality

Each woofer membrane on the SA1280 weighs only 1 gram – which makes the loudspeaker 4 to 6 times faster than a traditional speaker. This is why you get a more natural sound with more details - no matter if you are listening to music or using the speakers for home theatre. The long stroke woofers and the precise tuning of the cabinet gives a rich and precise bass performance – much more accurate than a big and traditional loudspeaker.

prepared for the future

Reproduction of new formats like Super Audio CD or DVD Audio is supported by the SA1280 by improved dynamics and a wide frequency range. The loudspeaker is fully magnetical shielded. It can be placed close to a TV without disturbances of the picture. Optional biwiring – and biamping – are both possible ways of improving your system even further

technical specifications

Frequency range (+/- 3dB): 35-35.000 Hz
Impedance: 4-8 Ohms (easy load)
Power handling: 170 Watts
Sensitivity (1W, 1m): 89 dB
Magnetical shielded: yes
Principle: 2.5 way / bass reflex
Sand chamber: yes
Biwiring: yes
Woofers: 2 x SA W1408AV
Tweeter: 1 x SA TWG2506AV
Dimensions (WxHxD) cm: 15x104x26.6
manufactured in an improved mk2 version from serial number 94011

Finish:

real wood:

black ash

cherry

maple
