

big sound from a compact speaker

SA205 is a surprisingly compact loudspeaker that provides real System Audio sound. It can be placed almost everywhere and can be used in all quality systems for both music and home theatre. It does not require a subwoofer.

With SA205 you fill the room with sound, not with loudspeakers. It is far more powerful than the size indicates and is magnetically shielded so that it can be placed close to a TV.

it can almost stand in the palm of a hand, the small SA205. The sound can fill a big living room

application of SA205

- for all kinds of music
- as front speaker in a home theatre system
- as rear speaker in a home theatre system

almost a cult speaker SA205 is available in Black Ash, Cherry and Beech (shown)

left: the SA205 mounted on the FS1 speaker stand

placement

- on the wall with the WB1 bracket
- from the ceiling with the CB1 bracket
- On the floor on the FS1 standers
